

Statement on COVID-19

May 18, 2020

Implantech is committed to the safety and well-being of our customers, employees and community. While working hard to avoid disruptions from the COVID-19 virus, we are taking all mitigation efforts seriously and closely monitoring the evolving situation.

Implantech's facilities have remained open in order to prevent product shortages and to participate in creating PPE to help keep health care workers safe. We have implemented safety, cleaning, and health check protocols as recommended by CDC and local health authorities.

Our products are manufactured in our registered medical device facility with approved environmental and personnel controls and monitoring, which have been appropriately reviewed and revised as needed for added safety protocols related to the virus. Device and shipment packaging should be safe to handle as the [U.S. Centers for Disease Control and Prevention](#), the [World Health Organization](#) have confirmed there is very short survivability of the COVID-19 virus on hard surfaces.

Due to the precautionary measures we have put in place to protect our employees against COVID-19, orders may take slightly longer to process. The delivery services (FedEx, UPS, etc) are not always able to guarantee delivery schedules, so please plan accordingly.

We would like to thank you for your cooperation and understanding during this challenging time. If you have any questions or concerns, please let us know.

Sincerely,

A handwritten signature in blue ink that reads "Renee Casswell". The signature is fluid and cursive.
