### Gelzone<sup>®</sup> Wraps

Combining scar management  
and compression healing

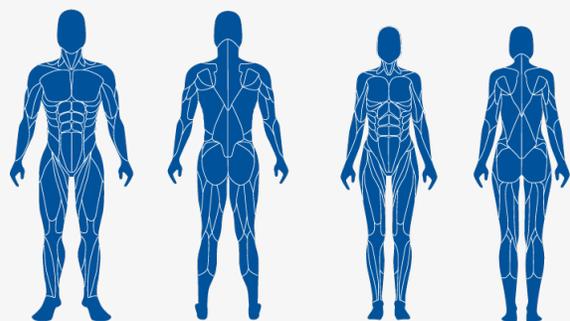

Combining both compression healing and scar management, Gelzone<sup>®</sup> Wraps are a distinctive choice for procedures like tummy tucks and brachioplasties.

#### 3D Accuscan<sup>®</sup> Patient-Specific Implants

Sometimes, even Implantech's broad selection of implants can't accommodate a patient's specific facial or body-contouring needs. An implant with a unique shape and size is required and is simply unavailable as a stock product.

In such cases, surgeons turn to our **3D Accuscan Patient-Specific<sup>®</sup> Implants**.

With 3D Accuscan<sup>®</sup> implants cleared by the FDA, you can feel confident in a system that allows you the ability to quickly and easily reconstruct most bony defects and soft tissue deficiencies, from head to toe.

Just supply us with the applicable CT scan. We'll then schedule a virtual planning session during which we assist you in designing an implant tailor-made for your patient.

After you approve the design (first in a PDF and later in a sample we provide), you'll receive the actual solid silicone implant just as you envisioned it.

**Contact us** for more info about our innovative 3D Accuscan<sup>®</sup> system.

The patented Gelzone® Wrap is made of stretchable, fabric-covered silicone gel that enables continuous contact around a closed surgical site. The soft-textured gel ensures the Wrap stays where it's put while offering the scar-managing advantages of silicone.

The Gelzone® Wrap also provides uniform compression to assist healing along with the added benefit of musculoskeletal support.

Check out our [PRODUCT SHEET](#) (below) to see the full range of Gelzone® Wraps, or [CLICK HERE](#) to access the typical uses for each size.

**THE GELZONE® WRAP**  
*More Than Just Support*

- Superior, cushioned comfort provides ideal uniform compression
- Easy application – Will not slip
- Excellent for hypertrophic and keloid scar management
- Ensures complete silicone gel contact on closed wounds in difficult areas
