Facial & Body Contouring Implants

Saturday & Sunday
NOVEMBER 12-13, 2022

Implantech

Advanced Techniques Using Facial & Body Contouring Implants

Can you spare a day or two to add huge value to your practice?

If so, we have just the thing for you.

Our two-day *Masters Educational Series* workshop in Las Vegas can open up new

The Flowers Tear Trough[®] Implant

Softening shadows from eye bags

An accumulation of fat or bags under the lower eyelids causes shadowing that gives the appearance of dark circles under the eyes.

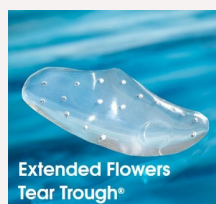

These dark circles can cause individuals to appear gaunt, tired and older-looking than they actually are.

The Solution – Implantech's *Flowers Tear Trough*[®].

The Flowers Tear Trough[®] is a supple, solid-silicone implant that fills the hollow below the eye bag.

The result is a fuller, more youthful cheek that transitions smoothly into a full lower eyelid.

For continuous augmentation into the cheek area, choose the *Extended Flowers Tear Trough*[®].

The Placement –
The Flowers Tear Trough[®] extends from the medial canthus to the lateral malar region and encompasses the infraorbital nerve.

A transconjunctival incision with lateral

avenues for your practice—and your peers who attend agree!

“Excellent! Not taught in training.”

“Not what I expected – it was 200% better!”

“I feel 100% ready to do all 5 facial implants.”

“I’ve attended this course before. I learn new techniques and gain on each visit.”

Regardless of surgical field or experience level, you’ll leave with invaluable information for real practice enhancement.

Your expert faculty explains the latest techniques using facial and body-contouring implants made of supple, solid silicone.

With both classroom and cadaver lab instruction, you’ll learn how to achieve aesthetic and long-lasting patient outcomes.

Your topics covered each day include:

01 FACIAL

HANDS-ON in CADAVER LAB

- Chin and jaw angle implants
- Malar and submalar implants
- Paranasal and nasal implants
- Temporal Shell implant

02 BODY CONTOURING

OBSERVE in CADAVER LAB

- Gluteal, pectoral & calf implants

Also discussed on both days:

- » Patient-specific implants
- » Challenging cases
- » Managing complications

Upon course conclusion, you’ll receive a Certificate of Completion, plus a “Course Certified” icon for prominent display on

canthotomy may be used for access.

The Result –
